IMPORTANT IMPORTANT

Revisions to this manual

- This is where we record changes to the manual. A revision might be a part number change, new instructions, or information that was not available at the time of printing.
- We reserve the right to make changes to this manual without notice and without incurring any liability by making the changes.
- Dishwasher owners may request a revised manual, at no charge, by calling 1 (800) 858-4477 in the USA or 1 (800) 263-5798 in Canada.

Revision Date	Revised Pages	Serial Number Effectivity	Revision Description

06.21.07	28	-------	Revised pump part numbers

Dear Owner:

Thank-you for choosing our dishwasher.
We appreciate your business.

This manual covers model:

301HT	Undercounter high temperature dishwashing machine with 40°F/23°C or 70°F/39°C rise built-in booster.

The installation, and initial start-up of your dishwasher must be performed by qualified electricians, plumbers, and authorized service technicians who are trained in commercial dishwashers.

Defects and repairs resulting from the improper installation of your dishwasher cannot be covered by the dishwasher warranty.

Mr. or Ms. Installer:

<u>Please</u> read the installation guide before you begin.
Thank you,

Your Dishwasher!

Limited Warranty

Moyer Diebel Limited, P.O. Box 4183, Winston-Salem, North Carolina 27115, and P. O. Box 301, 2674 North Service Road, Jordan Station, Ontario, Canada L0R 1S0 warrants machines, and parts, as set out below.

Warranty of Machines: Moyer Diebel Limited warrants all new machines of its manufacture bearing the name "Moyer Diebel" and installed within the United States and Canada to be free from defects in material and workmanship for a period of one (1) year after the date of installation or fifteen (15) months after the date of shipment by Moyer Diebel, whichever occurs first. [See below for special provisions relating to Model Series DF and SW.] The warranty registration card must be returned to Moyer Diebel within ten (10) days after installation. If warranty card is not returned to Moyer Diebel within such period, the warranty will expire after one year from the date of shipment.

Moyer Diebel will not assume any responsibility for extra costs for installation in any area where there are jurisdictional problems with local trades or unions.

If a defect in workmanship or material is found to exist within the warranty period, Moyer Diebel, at its election, will either repair or replace the defective machine or accept return of the machine for full credit; provided, however, as to Model Series DF and SW, Moyer Diebel's obligation with respect to labor associated with any repairs shall end (a) 120 days after shipment, or (b) 90 days after installation, whichever occurs first. In the event that Moyer Diebel elects to repair, the labor and work to be performed in connection with the warranty shall be done during regular working hours by a Moyer Diebel authorized service technician. Defective parts become the property of Moyer Diebel. Use of replacement parts not authorized by Moyer Diebel will relieve Moyer Diebel of all further liability in connection with its warranty. In no event will Moyer Diebel's warranty obligation exceed Moyer Diebel's charge for the machine. The following are not covered by Moyer Diebel's warranty:

a. Lighting of gas pilots or burners.
b. Cleaning of gas lines.
c. Replacement of fuses or resetting of overload breakers.
d. Adjustment of thermostats.
e. Adjustment of clutches.
f. Opening or closing of utility supply valves or switching of electrical supply current.
g. Adjustments to chemical dispensing equipment.
h. Cleaning of valves, strainers, screens, nozzles, or spray pipes.
i. Performance of regular maintenance and cleaning as outlined in operator's guide.
j. Damages resulting from water conditions, accidents, alterations, improper use, abuse, tampering, improper installation, or failure to follow maintenance and operation procedures.

Examples of the defects not covered by warranty include, but are not limited to: (1) Damage to the exterior or interior finish as a result of the above, (2) Use with utility service other than that designated on the rating plate, (3) Improper connection to utility service, (4) Inadequate or excessive water pressure, (5) Corrosion from chemicals dispensed in excess of recommended concentrations, (6) Failure of electrical components due to connection of chemical dispensing equipment installed by others, (7) Leaks or damage resulting from such leaks caused by the installer, including those at machine table connections or by connection of chemical dispensing equipment installed by others, (8) Failure to comply with local building codes, (9) Damage caused by labor dispute.

Warranty of Parts: Moyer Diebel warrants all new machine parts produced or authorized by Moyer Diebel to be free from defects in material and workmanship for a period of 90 days from date of invoice. If any defect in material and workmanship is found to exist within the warranty period Moyer Diebel will replace the defective part without charge.

DISCLAIMER OF WARRANTIES AND LIMITATIONS OF LIABILITY. MOYER DIEBEL'S WARRANTY IS ONLY TO THE EXTENT REFLECTED ABOVE. MOYER DIEBEL MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF MERCHANTABILITY, OR FITNESS OF PURPOSE. CHAMPION/MOYER DIEBEL SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. THE REMEDIES SET OUT ABOVE ARE THE EXCLUSIVE REMEDIES FOR ANY DEFECTS FOUND TO EXIST IN CHAMPION/MOYER DIEBEL DISHWASHING MACHINES AND MOYER DIEBEL PARTS, AND ALL OTHER REMEDIES ARE EXCLUDED, INCLUDING ANY LIABILITY FOR INCIDENTALS OR CONSEQUENTIAL DAMAGES.

Moyer Diebel does not authorize any other person, including persons who deal in Moyer Diebel dishwashing machines, to change this warranty or create any other obligation in connection with Moyer Diebel Dishwashing Machines.

Installation Guide

☑ *Unpack and Place (301HT)*

1. Check the corrugated box that protected the dishwasher during shipment for punched holes or impact marks.
2. Inspect the shipping pallet for splintered or broken boards.
3. Inspect the exterior of the dishwasher while still mounted on the pallet for signs of damage.
4. Contact the freight company immediately if damage is found and save all packing for inspection to verify your damage claim.
5. Report the damage to your equipment supplier. They will contact our factory for repair or replacement of damaged components.
6. If no damage is found, proceed with lifting the dishwasher from its pallet. Be careful to lift the dishwasher by the main frame if using a forklift.
7. Make sure the four legs are screwed firmly in place after landing the machine.
8. Check the packing list to ensure all accessories are with the dishwasher.
9. Open the doors and remove the dishracks inside the machine and locate the postpaid warranty cards inside the book.
10. Complete the warranty card and drop in the mail immediately.
11. Move the dishwasher close to its permanent location.
12. Locate the Quick Check Installation Card glued on the front door of the dishwasher. The card has a check list to familiarize the installer with the dishwasher installation procedures detailed in this manual.
13. Remove the protective covering from the dishwasher and identify the utility connections. Information cards and stickers must not be removed from the dishwasher until the installation is complete.

Installation Guide

☑ *Unpack and Place (301HT)*

Note:
Installation must allow for the ability to remove machine for servicing.

Caution: Care should be taken when lifting the machine to prevent damage.

The machine is normally shipped on a skid enclosed by straps. When transporting the machine, use a lift truck or fork lift, positioning the box properly on the forks.

1. Immediately after unpacking your machine, inspect for any shipping damages. If damage is found, save the packing material and contact the carrier immediately.
2. Remove the dishwasher from the skid. Adjust the feet if required, then move the machine to its permanent location.
3. Level the machine (if required) by placing a level on the top if the machine and adjusting the feet. Level the machine front-to-back and side-to-side.
4. Remove any foreign material from inside of the machine.

Note:
Installers must follow applicable sanitation, safety, plumbing, and electrical codes and regulations; and work in accordance with best practices for dishwasher installation.

Installation Guide

☑ *Electrical Connections (301HT)*

Note:
Leave enough electrical cable behind the machine so that the dishwasher can be pulled forward a minimum of two feet to be serviced.

Warning: Electrical and grounding connections must comply with the National Electrical Code and/or Local Electrical Codes.

Warning: When working on the dishwasher, disconnect the main electric service and tag it to indicate work is being done on that circuit.

1. The electrician should compare the electrical specifications on the machine electrical data plate (located in the control panel) to the electrical power supply before connecting the machine to the incoming service at a fused disconnect switch.

   IMPORTANT: The 208-240V/60Hz/1PH electrical supply service for this machine must be a 2-wire plus ground service. For optional 208-240V/60Hz/3PH the electrical supply service must be a 3-wire plus ground service.

2. On the 208V-240V models, a knockout is provided at the rear of the junction box for electrical service connections. A fused disconnect switch or circuit breaker (supplied by user) is required to protect each power supply circuit.

The MACHINE ELECTRICAL CONNECTION DATA PLATE is the certified authority for the dishwasher power requirements. DO NOT use electrical data from any other source unless an authorized factory representative instructs you to use other data.

Installation Guide

☑ *Plumbing Connections (301HT)*

Water Connections

1. Connect the hot water supply to the fill hose provided with a 3/4" NPT fitting.
2. Install a manual shut-off valve in the water supply line to accommodate servicing the machine. The shut-off valve should be the same size or larger than the supply line.
3. Install a 3/4" pressure reducing valve (PRV) (supplied with machine) in the water supply line, and set at 20-22 PSI/138-151kPa.

Drain Connections

1. Drain hose must be supported by bracket provided (shipped inside of machine).
2. The drain hose bracket must be mounted a minimum of 2 feet above the finished drain, either on the rear of the machine or on the wall.
3. The maximum height of the drain from the floor must not exceed 3 feet.
4. Connect the 3/4"I.D. flexible drain hose to a 1-1/2" wye (Y) drain fitting. Use a 3/4" hose adapter (supplied by others). Do not connect drain hose to a 90° drain fitting.

Note:
Plumbing connections must comply with local health and plumbing codes.

Installation Guide

☑ *Chemical Dispensers (301HT)*

Warning:
Chemical dispensers must be electrically grounded in compliance with applicable electric codes.

Detergent

The machine is equipped with an automatic detergent dispensing pump system.

1. Use a qualified detergent/chemical supplier for your detergent.
2. Your machine is supplied with a detergent dispensing pump that is internally wired and ready for use. Use a commercial grade liquid detergent and insert the red pickup tube into the detergent container. The pickup tube has a strainer on the end to prevent the crystallized chemical from clogging the supply lines.

Always wash hands under running water if they come into contact with the detergent and comply with the instructions pertaining to the specific type of detergent.

To prime the peristaltic pump:

1. Insert pick-up tube into the detergent container.
2. Close machine door and switch machine on.
3. Push and hold the prime switch.

Rinse Aid

1. Use a qualified/chemical supplier for your rinse aid needs.
2. Insert the transparent tube into the container containing the rinsing agent.
3. Push and hold the prime switch

Completing the Installation

1. Remove any foreign materials from inside the machine.
2. Install the scrap screens, wash and rinse arms, strainer basket and overflow tube.
3. After plumbing and electrical connections are completed, check machine for water leaks by closing the door, then depressing the **ON** switch. This allows the tank to begin filling and to reach temperature.
4. Open the door and check the water level. The water level should be 2 inches above the scrap screen.
5. Close the door fully.

Caution:
Connecting chemical dispensers at points other than those recommended by the factory may damage the dishwasher electrical system. Damage caused by the installation of chemical equipment will not be covered by our WARRANTY.

Installation Guide

☑ *Initial Start Up (301HT)*

1. The built-in stainless steel electric booster **was shipped without water.**
2. A manilla card located above the power switch explains how to turn the machine on for the first time.

Let's begin the Initial Start-up:

1. Check the placement of the dishwasher:
   ☑ Compare the machine location with the building plan or consult the owner or the General Contractor for approval.
2. Check that all options and/or accessories are installed.
3. Remove protective white wrapping, tape, and other packing materials and discard.
4. Remove any foreign materials from the interior of the machine.

Installation Guide

☑ *Initial Start Up (301HT)*

The following is a summary of your model 301HT dishwasher operating cycle:

1. The door must be closed to begin the cycle.
2. Press the **POWER** button to fill the wash tank.
3. The booster heater comes on when the correct water level has been reached.
4. Press and hold the **START** button to start the cycle. NOTE : After pushing the start button the first cycle of each day could take at least 15-20 minutes if the machine was not allowed to warm up first.
5. The pump runs during the wash cycle for approximately 120 seconds. **The wash cycle duration is extended if the booster water temperature does not reach 180°F/82°C.**
6. After a 5 second pause, the fill valve opens and the rinse cycle starts.
7. The machine rinses for 15 seconds. The cycle light turns off indicating that the cycle is complete. **DO NOT** open the door until the cycle light turns off.
8. Open the door and remove the rack of clean ware.

Operation

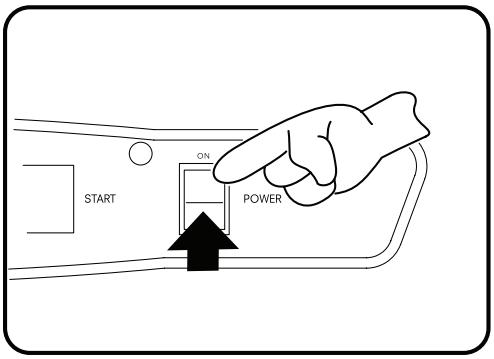
☑ *How to Operate Your Dishwasher (301HT)*

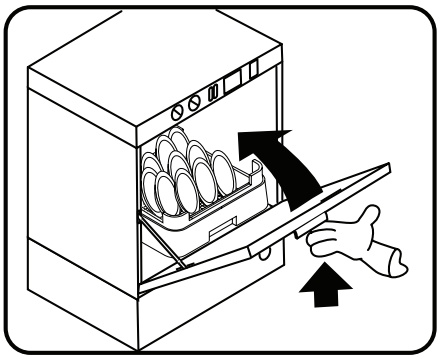
Operation Procedures

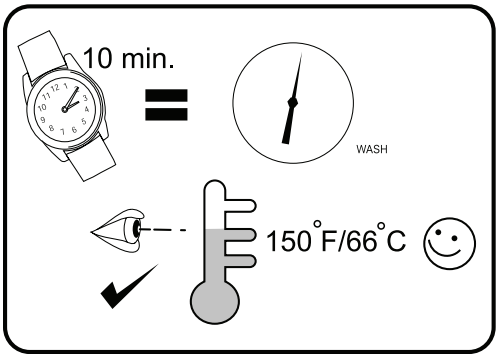
1. Check that the spray arms, overflow tube and scrap screens are in place.
2. Close the door. Press the **POWER** switch. The tank will begin to fill with water. **This procedure is only needed when the tank is empty.**
3. When the tank is full, check the wash tank temperature gauge. Minimum wash temperature is **150°F/66°C**.
4. Scrap and preflush all items to be washed, load items into rack. Wash only one layer of silverware in a rack at a time.

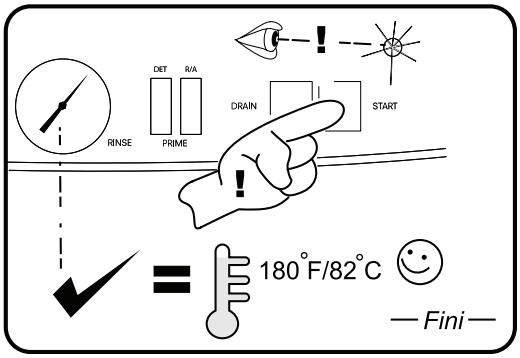
   Note: ***DO NOT OVERLOAD*** the rack.
5. Open the door and insert the rack of wares into the machine.
6. Close the door. Press the **START** switch and hold for 1 second, then release. This will start the wash cycle. The light illuminates.

Note: The machine may be stopped at any time during the cycle by opening the door. Closing the door resumes the cycle where it was stopped.









Operation

☑ *How to Maintain Your Dishwasher (301HT)*

Maintenance

1. Check the rinse temperature during the final rinse. The final rinse must be 180°F/82°C minimum.
2. When the green cycle light turns off, the cycle is complete.
3. Open the door and remove the rack.
4. Repeat steps 4-9 for additional cycles. Machine operation is automatic.
5. Clean the scrap screens after every meal period. During heavy usage the scrap screens should be cleaned more frequently.
6. At the end of the day, any water in the tank should be drained by pressing the **POWER** button to turn machine off and removing the **overflow tube.** Press and hold the **DRAIN** switch to activate the drain pump and completely drain the machine.

Operation

☑ *How to Clean Your Dishwasher (301HT)*

Cleaning Schedule

Meal Periods

1. Press power switch **OFF**
2. Remove the overflow tube and press and hold the **DRAIN** switch to drain the machine.
3. Wipe the interior to remove any debris.
4. Clean the screens after every meal period and more frequently during heavy usage. Do not allow screens to become clogged with debris.
5. Inspect wash and rinse arms. Clean if necessary.
6. Replace overflow tube.
7. Close door.
8. Press the **POWER** button to refill machine.

Daily Maintenance

1. Keep your dishwasher and the surrounding area spotlessly clean.
2. Immediately report loose, broken or missing parts to your supervisor.
3. Check drains for flow restrictions.
4. Check the dishwasher for leaks.
5. Operate the dishwasher as explained in this manual.

Operation

☑ *How to Clean Your Dishwasher (301HT)*

Thoroughly cleaning your dishwasher every day is the very best maintenance you can do!!

Monthly Maintenance

1. Inspect pump hoses, door linkage, springs, and exterior of dishwasher for wear.
2. Inspect the wash arm bearings and O's.
3. Check the condition of scrap screens, and dishracks for bent or broken pieces.
4. Check the toggle switches and indicator lights for damage.
5. Check the wash pump motor for loud bearings and leaking pump seal.
6. Create a simple Maintenance Tracking System as a guide for service.

Annual Maintenance

Call your authorized service agent or local service representative and schedule a complete inspection of your dishwasher by a trained professional.

A Maintenance Tip -

Schedule your annual maintenance when you can give the service agent unrestricted access to the dishwasher for at least 2 to 2-1/2 hours.

CFESA
Commercial Food Equipment Service Association

Operation

☑ *How to Clean Your Dishwasher (301HT)*

Deliming

1. Add the delime chemical to the wash tank (per the chemical supplier specifications).
2. Close the door.
3. Press the **POWER sw**itch to fill the machine, then press the **START** switch to run through a complete cycle.
4. When cycle is complete press the **POWER** switch to the OFF position, open the door and remove the overflow tube to drain the tank, then press and hold the **DRAIN** switch to drain the machine.
5. Replace overflow tube. Close door.
6. Repeat steps 3 - 5 to ensure all delime chemicals are purged from machine.
7. Deliming is now complete.

The Troubleshooter

☑ *The Troubleshooter (301HT)*

In order to find the cause of a breakdown or abnormal operating condition in your dishwasher please ensure that:

1. All power switches are ON
2. Drain overflow tube is in place and seated
3. Wash pipe and rinse nozzles are clean
4. Spray arms are in their proper positions
5. Round screen is properly positioned
6. Detergent, sanitizer and rinse aid dispensers are adequately filled
7. Door is fully closed.

That wasn't it? Check for a solution below:

Condition	***Cause***	***Solution***
Cycle keeps running and does not finish	Cold machine	First cycle of the day could take 20 minutes if machine did not warm up.
Machine will not start	Main switch disconnected	Turn on switch
	Door not closed	Make sure doors are fully closed
	Door safety switch faulty	Contact your service agency
	Start switch faulty	Contact your service agency
Low or no water	Main water supply is turned off	Turn on house water supply
	Drain/overflow tube is not in place and seated	Place and seat drain/overflow tube
	Machine doors not fully closed	Close doors securely
	Faulty fill valve	Contact your service agency
Continuous water filling	Fill valve will not close	Contact your service agency
	Drain/overflow tube not in place	Install drain/overflow tube in tank
	Air trap lost pressure	Drain machine, reinsert overflow tube and refill machine.
Motor not running	Defective motor	Contact your service agency
Wash tank water temperature is low when in use	Incoming water temperature at machine too low	Raise temperature to 140°F
	Defective thermometer	Check or replace
	Defective thermostat	Check for proper setting or replace
	Defective heater element	Check or replace

The Troubleshooter

☑ *The Troubleshooter (301HT)*

Condition	*Cause*	*Solution*
Insufficient pumped spray pressure	Clogged pump intake screen	Clean
	Clogged spray pipe	Clean
	Scrap screen full	Must be kept clean and in place
	Low water level in tank	Check drain and overflow tube
	Defective pump seal	Contact service agent
Insufficient final rinse or no final rinse	Clogged rinse nozzle and/or arm	Clean with paper clip/delime
	Clogged strainer	Clean or replace
Low final rinse temperature	Low incoming water	Check the booster be sure the thermostat is set to maintain 180°F/82°C temperature. Check fill valve operation.
	Defective thermometer	Check for proper setting or replace
Poor washing results	Detergent dispenser not operating properly	Contact detergent supplier
	Insufficient detergents	Contact detergent supplier
	Food Soil concentration too high in wash tank	Drain tank, clean and refill every 2 hours of operation or after each meal period.
	Wash water temperature too low	See condition “Wash Tank Water Temperature” above
	Wash arm clogged	Clean
	Wash arm not rotating	Clean arm. Check bearing, replace if necessary.
	Improperly scrapped dishes	Check scrapping procedures
	Ware improperly placed in rack	Use proper racks. Do not overload racks
	Improperly cleaned equipment	Unclog wash sprays and rinse nozzles to maintain proper pressure and flow conditions. Overflows must be open. Keep wash water as clean as possible.
	Heating element has soil/lime buildup	Clean and/or delime.
	Detergent pick up tube in incorrect container	Place RED pick up tube in detergent container.
